PROFESSIONAL SUMMARY

Frontend Software Engineer with 4+ years of hands-on experience building production-grade web applications across SaaS, e-commerce, prop-tech and ed-tech domains. Proven track record shipping complex features — from multi-currency discount engines and Stripe/Paystack integrations to WordPress plugin pipelines and dynamic theming systems — while working across React, Next.js, TypeScript, PHP, and Supabase. I'm comfortable operating as the sole technical lead or as part of a cross-functional team, with a consistent focus on clean, reusable code, keen attention to details, and tangible product impact.

EXPERIENCE

Frontend Software Engineer (Contract)

Dec 2025 – Present

Dootling — E-Commerce SaaS Platform

- Engineered a multi-currency discount and coupon engine with per-currency amount fields, powering promotional campaigns across all merchant storefronts.
- Built a CartCheckoutDrawer with Stripe payment method-aware fees and shipping integration, cutting checkout friction significantly.
- Developed a two-tier KYC system, a 'Buy for Someone Else' gifting flow, and a dynamic theme customisation system spanning 15+ store themes using CSS custom variables.
- Shipped a store extensions marketplace (Stripe + Paystack), social media scheduling, returns management, and responsive improvements across 20+ dashboard components.

Full-Stack Software Engineer (Contract)

Mar 2025 – Present

Design Agency — WordPress & Next.js Projects

- Built and maintained AIO Booking Bridge, a WordPress plugin integrating Next.js frontends with WPForms, Google Sheets (via ActionScheduler), and a three-tier email fallback pipeline.
- Diagnosed and eliminated a recurring Microsoft Outlook OAuth disconnection bug tied to Azure's 90-day token expiry for unverified apps.
- Built and translated design for various UI into responsive and interactive websites.

Frontend Software Engineer Jun 2022 – Present

Pronact Inc.

- Built reusable React components and integrated REST APIs across multiple product features, collaborating with engineering and design teams throughout the full lifecycle.

Frontend Software Engineer Jan 2023 – Nov 2023

Peregrine Falcon Messenger

- Delivered all UI screens from design specs; worked with backend and QA teams; conducted cross-browser testing via BrowserStack.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, PHP, HTML, CSS / SCSS
Frameworks	React.js, Next.js, TailwindCSS, Redux
Backend / DB	Supabase, Firebase, MySQL, Node.js
Payments	Stripe, Paystack
CMS / Plugins	WordPress, WPForms, ActionScheduler, Custom Plugin Dev
Tools	Git / GitHub, Vercel, BrowserStack, Figma

SELECTED PROJECTS

Vesspor — Real Estate Co-Investment Platform <https://www.vesspor.com>

— [Next.js](#), [TailwindCSS](#), [Redux](#), [JWT](#)

Democratises real estate investment by letting users co-own properties and earn rental income. Built end-to-end: property exploration, investment flow, and authentication.

All In One Home Inspections

<https://www.allinonehomeinspections.com> — [Next.js](#), [REST APIs](#), [Vanilla CSS](#)

Web platform for requesting, scheduling, and managing property inspections with automated pricing based on property size — serving both residential and commercial clients.

OA Academy — Digital Art Learning Platform <https://www.oaacademy.online>

— [Next.js](#), [PHP/MySQL](#), [Vanilla CSS](#)

Improved UX for class sessions, curriculum access, and course materials. Implemented a private class system, admin dashboard for content management, and secure student access.

EDUCATION

B.Tech in Computer Science

Dec 2023

Federal University of Technology, Akure (FUTA) — Ondo State, Nigeria
